

# GT512A

**Brand:** AUDIOCENTER

**Product Code:** 0124

**Availability:** In Stock

**Weight:** 52.91lb

**Dimensions:** 17.56in x 17.56in x 27.09in

**Price: \$1,059.00**

## Description

The GT512A speaker has two combo inputs (2-way XLR and Mono jack 6.35). The CH A input can be switched between line balanced input or microphone input. The two audio sources can be internally mixed and output as a balanced output, transmitting the signal to multiple speakers for easy system signal cascading distribution.

The cabinet is made of high-quality wood, with an innovative and compact multi-purpose symmetrical cabinet structure CNC machined. This provides clear and powerful perfect sound quality. The base mounting holes are available in 0° or 10° options. According to different installation locations and methods, the cabinet can meet different sound reinforcement installation environments.
