

GT515A

Brand: AUDIOCENTER
Product Code: 0126
Availability: In Stock
Weight: 61.73lb
Dimensions: 20.32in x 20.32in x 30.91in

Price: \$1,155.00

Description

The GT515A speaker has two combo inputs (2-way XLR and Mono jack 6.35). The CH A input can be switched between line balanced input or microphone input. The two audio sources can be internally mixed and output as a balanced output, transmitting the signal to multiple speakers for easy system signal cascading distribution.

The cabinet is made of high-quality wood, with an innovative and compact multi-purpose symmetrical cabinet structure CNC machined. This provides clear and powerful perfect sound quality. The base mounting holes are available in 0° or 10° options. According to different installation locations and methods, the cabinet can meet different sound reinforcement installation environments.
