Description

These amplifiers are based on their predecessors DALIM amps, where DSP has been removed; for these applications where external DSPs are used, so you do not have to pay extra money for it.

In the design it has been implemented the advanced RAM Audio Power Control Management to configure through the DSP how to sharing the power between the channels according to the user needs, having the possibility to obtain in just one channel the maximum power.

Optional GPIO, DANTE and AES67 inputs are available for DALIMa amplifiers.
